REST API apps

Create an app to receive REST API credentials for testing and live transactions.

Note: Features available for live transactions are listed in your [account eligibility](#).

Create App

App Name	Type	Actions
Techybirds 1	REST	

NVP/SOAP API apps

Legacy PayPal apps (e.g., Adaptive Payments, Adaptive Accounts, Adaptive Permissions) are now called NVP/SOAP API apps.

Note: New! An alternative to IPN is now available. Create webhooks for your NVP/SOAP integration and get notified when new events occur.

Enable Webhooks

4. click on **account eligibility** you will see following page. (Note : If not found just refresh page.)

Create New App

Create an app to receive REST API credentials for testing and live transactions.

Application Details

App Name

Sandbox developer account

programmer1.techybirds-facilitator@gm

As a reminder, all apps created under your account should be related to your business and the type of business it conducts.

By clicking the button below, you agree to [PayPal Developer Agreement](#).

Create App

Add **App name** whatever you want.

6. Click on **create App**. You will redirect to a page

Test App

App display name: Test App

SANDBOX API CREDENTIALS

SANDBOX WEBHOOKS

Configure webhooks to notify your app when certain events occur. To configure a webhook, define your webhook listener URL and a list of events for which to listen. You can configure up to ten webhooks. Each webhook can subscribe to either specific events or all events. To learn more about webhooks, see [webhooks notifications](#).

Sandbox **Live**

You can see **client ID** and **Secret**.

If you can not see **Secret** key, just click on **Show** link.

You can toggle **Sandbox** and **live** button to see sandbox and live key.

NOTES:

YOU CAN GENERATE LIVE KEY ONLY IF YOU CREATE BUSINESS ACCOUNT.
